EAPPROVAL NO LONGER AVAILABLE TO MAIN USERS

Beginning May 13, 2002, the eApproval process will no longer be available to MAIN users. All Requisitions and Direct Vouchers that users would have approved through eApproval must be approved through ADPICS.

eApproval was originally developed as a pilot to determine the cost-effectiveness of this approach to approving ADPICS documents. As users of eApproval have observed, this solution did not deliver anticipated benefits. In addition, it was very costly to maintain. Therefore, due to the combination of its very low usage and very high cost of maintenance, MAIN cannot afford to continue its support.

In contrast to the solution provided by eApproval, MAIN plans to continue developing web interfaces that offer greater cost-benefit results.
